July 3rd, 2013

Lake Conditions

Lake Levels ... Both lakes are right at Summer Pool. For additional info, including generation schedule for Kentucky Lake, visit the TVA website: http://www.tva.gov/lakes/kyh_r.htm

Water Clarity and Temperature ... The water color and conditions in both lakes are just right for fishing. Clear in the main lake and just a touch of color in the bays. Main Lake surface water temps are in the 82 degree range with temps in the bays rising in the afternoons on sunny days.

Weather Outlook

Independence Day... Mostly cloudy with a 40 percent chance of showers and thunderstorms. High around 80 with East winds around 5 mph. **Thursday Night...** Mostly cloudy with a 30 percent chance of showers and thunderstorms. Lows in the mid 60s. East winds 5 mph

Friday... Partly sunny with a 30 percent chance of showers and thunderstorms. Highs in the lower 80s. Calm winds in the morning becoming southeast 5 mph in the afternoon. **Friday Night...** Mostly cloudy with a 30 percent chance of showers and thunderstorms. Lows around 70.

Saturday... Mostly cloudy with a 50 percent chance of showers and thunderstorms. Highs in the lower 80s. **Saturday Night...** Mostly cloudy with a 50 percent chance of showers and thunderstorms. Lows around 70.

Sunday... Mostly cloudy with a 40 percent chance of showers and thunderstorms. Highs in the mid 80s.

Sunday Night... Mostly cloudy with a 30 percent chance of showers and thunderstorms. Lows in the lower 70s.

Fishing Report

(Photos) (L) Chris Clarke from St. Louis and (R) Tony Moore from Remington Arms Company with a some nice Shakey Head bass caught on the Ledges this week.

Bass Fishing ... We've had a real good run bass this week with a better than average size and one of us is catching a really big fish daily. We are doing some things differently to catch these fish

so if you want to book a trip give us a call Bass Extractor jig and ZMan Finesse worm. Our bigger fish this week have come on the Shakey head.

Ledge Bite ... We've found schools of fish on the main lake ledges 13 -22 feet deep during high generation and as deep as 35 feet during slack times. During high current we've been dragging a ZMan Flappin CrawZ on either a Ken's 5/8 Ledge Grouser or PJ's 7/16 oz Bass Extractor jig. A close second would be using a 3/16 oz. PJ's Bass Extractor jig and a ZMan finesse worm. The color didn't matter!

White Bass ... Fishing is great and we've been catching them on **Steel Shad blade baits** and **Ken's Hybrid spinners**. The whites are deep and relating to current on the main lake and near the mouth of the bays. Stripe Fishing gets an A+. **Check out the Pontoon Pictures below ...**

Bluegill & Redear ... The mayfly hatch is on again off again but if you find a hatch stop and fish that location. Look for overhanging trees with mayflies dropping in the water. Take a Shelton's Bluegill bug or a Ken's cricket tipped with a piece of red worm, wax worm or cricket. Use your High Definition Electronics in Side Scan to find the beds and go to work. Look for gravel banks in the back of the bays and you'll be in business.

Catfish ... While we didn't fish for cats specifically one couldn't notice how many we caught this week on the Steel Shad blade bait.

Crappie ... We didn't fish for crappie this week therefore there is no report.

Catch Fish & Have Fun on the Kick'n Bass Pontoon

Wow! The kids had some fun thanks to Greg and Kick'n Bass! The Greg Spink Group from Louisville enjoyed a fun filled day July 3rd on the Pontoon catching LOTS OF FISH!

Get Your Family or Friends Together and Book Your Trip Now!

If family fishing is your thing or just getting a group together to fellowship then the Kick'n Bass Pontoon is for you! If you want to have a Kick'n Good Time and catch some fish then you ought to book a trip on the Kick'n Bass Pontoon.

Pictures tell the story. Check out the smiling faces. These folks had a BLAST!

Corporate or Company Trip Packages Available Too!

Sonar Tip of the Week ...

Fish school up big time during the hot months more than at any other time of the year. The screen shows a huge school of crappie on an underwater ledge with a shell bed on it. The ledge tapered to about 18 feet before it dropped into the Tennessee River channel. We used a Steel Shad blade bait and counted it down to 10 feet. We then brought the lure thru the school using a side sweep motion and caught several nice Black Crappie. If the blade bait fell to the shells a catfish would grab it. Locating this school would not have been possible without our Touch Screen Unit Bow Unit and HDI Transducer.

on the *If you want to get more out of your HDS system contact rk@kicknbass.net for your personal "On the water Sonar Class"*

Read the owner's manual or watched a DVD and still baffled? Let's clear up your Sonar confusion. Have your unit(s) programmed and optimized by someone who depends on the HDS technology daily. Together we can make your system more user friendly and you'll get more out of your system.

Remember ... *The first step in our "On the Water Sonar Class" is to perform an inspection of your system to make sure the installation has been done to factory specs and all components are installed in the proper location. If adjustments are needed we can have them made prior to beginning your class. Doing so assures you that your system will perform at a high level and you'll get the most out of your time on the water.*

The "On the Water Sonar Class" is a one on one, hands on, in your boat using your electronics instruction that will take your understanding and know-how to another level. We get it and you will too!

Kick'n Bass' 7 Essential Steps to Simplify Using Your HDS System.

Kick'n Bass will perform the following ...

- 1. Complete a detailed inspection on your system to certify the installation has been done to factory specs. *(If adjustments are required technicians are available to fine tune your system prior to beginning your class. Doing so assures you that your system will perform at an optimum level and you'll get the most out of your time on the water).***
- 2. Check all network settings for compatibility and make adjustments if needed.**
- 3. Program the individual screens and install the overlay data that is best suits the type fishing you do. Example: Depth, Water Temp, Time, etc. Eliminate unwanted, non-practical on screen clutter that hampers using your unit to its maximum potential.**
- 4. Arrange the screens so that going from page to page is orderly and non-confusing. You'll become familiar with the screens and commands and what they'll do for you.**
- 5. Dial in Sonar and Structure Scan Graphics and choose appropriate Palette for the lakes you fish.**
- 6. Demonstrate the art of waypoint management. No more cluttered maps with useless or unproductive waypoints. You'll learn to identify which locations are waypoint worthy and how to go back to those locations without ever assigning a waypoint. You'll assign a waypoint once you are satisfied the location is worth saving.**
- 7. Demo the unit so you'll be able to take advantage of its fish finding capabilities. You'll learn to identify shell beds, submerged stumps, brush piles, ledges, game fish species and more.**

As a bonus Kick'n Bass will help you learn to read an electronic topo map and find "places of interest" that could be potential fishing hot spots.

The Best Bow Mount Sonar Bracket Ever Works on Virtually All Boats

Phoenix Bow Mount Bracket
