Dec 29th, 2013

***We'll be Kick'n Bass at the
LET' S GO FISHING SHOW
Jan. 3-4-5***

We'll have a lot for you to see ...

- *An awesome taxidermy display of trophy fish caught during our guide trips.*
- *See the all-new, state of the art Dura-Plate and Smart Bracket Sonar Mounting System (Patent Pending Design).*
- *Watch RK catch his biggest Asian carp ever, a 50 lb. monster below Barkley Dam.*
- *Learn how we catch slab crappie by trolling crank baits from the Kick'n Bass Pontoon.*
- *View "On the Water" Sonar class photos in High Definition.*
- *Be sure and Ask about our "Canadian Wilderness Adventures". Go with us and camp and fish in the BWCA and Quetico Park.*

Check us out ... Booths 47-48!

SONAR TIP OF THE WEEK ...

With several gates open at KY & Barkley Dams this week, the current has been very strong and the fish have reacted accordingly. During times of increased current, game fish will seek refuge and look for a place that is suitable to rest and feed. This screen shot shows a near perfect scenario ... a ledge with stumps where bass can ambush baitfish as they pass by and a drop where baitfish and other game fish can gather. We used a Steel Shad blade bait to catch several nice Largemouth and white bass and some Hybrids that turned us every which way but loose. No way would we have found this location without the aid of our Lowrance HDS System.

You can find locations like this too! You've made a Significant Investment in Electronics. Be the best angler you can be by learning to use your electronics to their full potential. For your personalized "On the water Sonar Class" contact Lowrance Pro Staffer Randy Kuhens at rk@kicknbass.net

Here's what some of our clients are saying about Kick'n Bass' "On the Water" Sonar Class ...

Randy, I knew my system had a lot of problems when I spoke to you on the phone and I was glad that you were interested in helping me resolve my issues. To be honest I had no intention of doing the class, instead I was looking for someone that could help me get my system straightened out. The more we talked it became apparent that I could benefit by taking the class so I decided to take it anyway. Boy was I surprised. Not only does my system function perfectly now I actually know how to use it thanks to taking your class. I'd recommend anyone wanting to get the most out of their system to contact you. This whole experience was very satisfying to say the least.

Kick'n Bass offers a one on one, hands on, in your boat using your electronics class that will take your understanding and know-how to another level! IF YOU'RE **CONFUSED, FRUSTRATED, AND NEED ANSWERS then Kick'n Bass' "On the Water Sonar Class" is for YOU!**

Here's just some of what Kick'n Bass can do for YOU!

- **Make sure your HDS unit(s) has the correct settings for the type of fishing you do.**
- **Program the individual screens and install the overlay data on the screen that you want. Example: Depth, Water Temp, Time, etc.**
- **Arrange the screens so they display what you want them to show and make going from page to page orderly and non-confusing.**
- **Eliminate unwanted, non-practical on screen data that clutters your screen and gets in the way of using your unit to its maximum potential.**
- **Learn the art of waypoint management. No more cluttered maps with useless or unproductive waypoints. You'll learn how to identify which locations are waypoint worthy and how to go back to those locations without ever assigning a waypoint. You'll learn to only assign a waypoint once you are satisfied the location is worth saving.**
- **Demo the unit for you to help you be familiar with the screens and commands, so you'll have a good understanding of how to use the unit and take advantage of its fish finding capabilities.**

As a bonus Kick'n Bass will help you learn to read an electronic topo map and find "
