Jan 10, 2014

Lake Conditions – Early this morning the boat ramps located here on the North end were still iced in. Also the bays have a significant amount of ice in them. If you are able to launch and decide venture out do so at your own risk and proceed with caution. Remember, always wear your PFD and advise others of your plans.

Lake Levels ... As of this morning both lakes are a approximately one foot above winter pool. For additional info, including generation schedule for Kentucky Lake, visit the TVA website: http://www.tva.gov/lakes/kyh_r.htm **There are multiple number of gates open at the Dams creating significant current in the main lake and below the Dams. Proceed with caution.**

Water Clarity and Temperature ... Kentucky Lake ranges from stain in some of the creeks with the main lake color varying from clear to murky. Barkley is stained and the main lake is murky. Surface water temps on both lakes are around 40 degrees.

Weather Outlook

Friday...Mostly cloudy with a 30 percent chance of rain. Highs in the lower 50s. South winds 10 to 15 mph.

Friday Night...Rain. Lows in the mid 40s. South winds 10 to 15 mph. Chance of precipitation near 100 percent.

SONAR TIP OF THE WEEK ...

“Find & Return to Fishing Hot Spots Without Ever Assigning a Waypoint”!

Is your map cluttered with too many waypoints? Can't remember which waypoints are productive and which ones aren't? Learn a better way to mark a location and go back to it without assigning a waypoint. Only assign a waypoint to locations that you feel are worthy of a waypoint. Learn how to do this and more. You've made a Significant Investment in Electronics. Be the best angler you can be by learning to use your electronics to their full potential. For your personalized "On the water Sonar Class" contact Lowrance Pro Staffer Randy Kuhens at rk@kicknbass.net

Remember ... *The first step in our "On the Water Sonar Class" is to perform an inspection of your system to make sure the installation has been done to factory specs and all components are installed in the proper location. If adjustments are needed we can have them made prior to beginning your class. Doing so assures you that your system will perform at a high level and you'll get the most out of your time on the water.*

Here's what some of our clients are saying about Kick'n Bass' "On the Water" Sonar Class ...

Randy, I heard about your class from a member of our bass club. He was very pleased with his class and highly recommended that I do one. I didn't tell you this when we were together but to be honest with you taking the class was a last ditch effort on my part to learn how to use my system. I have never been so confused and frustrated by anything in my entire life. Your class changed all that and I have to say that I was very pleased. I especially appreciate you taking the time to look my system over and making sure everything was set up to factory specs. Also recognizing where my weaknesses were and working with me to overcome them was very beneficial to me. I'm confident that what I learned in your class will help me become a better angler. Count me as another satisfied client!

Paul Rudzinski – Champaign, IL USMC Ret.

**Kick'n Bass offers a one on one, hands on, in your boat using your electronics class that will take your understanding and know-how to another level!
IF YOU'RE **CONFUSED, FRUSTRATED, AND NEED ANSWERS** then Kick'n Bass' "On the Water Sonar Class" is for YOU!**

Here's just some of what Kick'n Bass can do for YOU!

- **Make sure your HDS unit(s) has the correct settings for the type of fishing you do.**
- **Program the individual screens and install the overlay data on the screen that you want. Example: Depth, Water Temp, Time, etc.**

- Arrange the screens so they display what you want them to show and make going from page to page orderly and non-confusing.
- Eliminate unwanted, non-practical on screen data that clutters your screen and gets in the way of using your unit to its maximum potential.
- Learn the art of waypoint management. No more cluttered maps with useless or unproductive waypoints. You'll learn how to identify which locations are waypoint worthy and how to go back to those locations without ever assigning a waypoint. You'll learn to only assign a waypoint once you are satisfied the location is worth saving.
- Demo the unit for you to help you be familiar with the screens and commands, so you'll have a good understanding of how to use the unit and take advantage of its fish finding capabilities.

As a bonus Kick'n Bass will help you learn to read an electronic topo map and find "
